

## JT25 Base Clear

JT25 Base Clear is an adhesive (BINDER) which gives good adhesion between injected resin and printed ink surface.

### **Type**

Special resin  
Air drying single component ink

### **Usage**

Insert molding, in-mold forming for mobile-phone parts and touch panels of home electric appliance, etc.

### **Feature**

Good heat resistance with flexibility, suitable for ABS, PC and PMMA injection resins.

### **Diluent**

Standard solvent	T-912
Slow dry solvent	T-920
Retarder	T-980

### **Wash-up solvent**

T-31

### **Screen mesh**

Tetron or Nylon 200~300/inch fabric is recommended

### **Drying**

80° x 60min.
