

MIRACLE COLOR 5

Miracle Color 5 is unique metallic ink which provides for variety of color shades being changed when viewed from different angles, and it creates many different shades by arranging the pigments.

You can get considerable rare & rich colors on a variety of substrates because it can be formulated in almost all of our ink series.

Usage : Miracle Color 5 can be printed on various materials by changing ink series.

Feature : Miracle Color 5 consists of three main colors ;741 pearl, 742 pearl and 743 pearl, and can afford unique designs like solidity, various polarizing color by arranging combination of 3 basic colors and applying multi-printing.

Color variation : Three basic colors can offer following polarizing pattern on black background.
* 741 pearl = Red copper – Orange - Green
* 742 pearl = Purple - Green
* 743 pearl = Bluish Green – Silver - Reddish purple
Twenty seven colors, M001~M027, were color-matched by using the 3 basic colors.
Miracle 5 Color Chart was printed and backed up by CAV-710 Black on the back side of Polycarbonate.

Screen mesh : Polyester 225 mesh/inch or coarser is recommended

Particle size of Pigment : 5~10 μ

Caution : Stir Miracle Color 5 well prior to printing because these pearls are inclined to precipitate.
Check Miracle Color 5 performance and color shade before production run as these characteristics may change depending on your printing condition.
